GROUP 1

Technology and the Shopping Experience

How to be a safe online shopper?

Before Online Shopping

- People needed to go to physical stores to make purchases.
- People with accessibility and mobility issues can't shop easily.
- People can only buy items available locally.

After online shopping

- People can shop for their needs in the convenience of their homes.
- People can buy from stores all over the world.
- Job opportunities in delivery and fulfillment centers have increased.

PayPal

Having a PayPal account to pay online, instead of paying directly with your credit card is a way to improve your security as it adds another layer of protection.

Online Shopping Security

Buying from websites you know and have good reputations for being safe, not scamming their custommers and delivering the promised products on time.

Always check reviews

Checking the reviews of the products you're buying can inform you about the specifics of what you're buying and the reputation of the seller, making your purchases more safe.

Take note of your spendings

By checking regularly how much money is being withdrawn from your bank account you can check if it's only you who is making transactions. And you can also control your own spending, which avoids higher ammount of money in the bills.

Reach support

If by any chance you meet a problem feel free to contact the support services and always make sure that your voice is heard.

Always use strong passwords

Using a strong password can prevent hackers from getting into your shopping accounts and will keep you and your money safer.
